(54) Title: NETWORK FOR LOCATING A WIRELESS TAG

WO 2005/031383 A1

(57) Abstract: A network for locating a wireless tag comprises a plurality of wireless nodes. The nodes are not connected together by a wired network. Each node is included in a floor tile for installation inside a building and configured to be wirelessly connectable to at least one other node. When the floor tiles are installed, the plurality of nodes form a mesh or grid and provide overlapping wireless coverage for locating the tag by reference to mesh.
